Application DEVELOPMENT

Application DEVELOPMENT

Since 1998 Sioure has been developing database driven high end applications for large, medium and small business. Our application solutions have been implemented for industries such as Insurance, Banking, Airlines, Cruising and Non-Governmental organizations.

We develop applications for any online community present in any social media platform. We design custom Facebook, Twitter and Mobile Applications for your business needs. Our developers build social media applications with interactive and user-friendly interfaces for accessibility.

Mobile

APPLICATIONS

Mobile applications has been in great demand as technology has become much more advance. Sioure application development team goes one step further with our clients by maneuvering the complexity of the coding applications to allow our client's website visibility and functionality to be perfect on any screen size. Sioure has been successfully developing mobile applications that automatically resize the page layout to best suit the screen size

- Maximize your online visibility
- Increase your target audience
- Be up to date with technology

We develop mobile apps for:

Reliable Development

FOR EVERYDAY USAGE

Social Media APPLICATIONS

Sioure develops social media applications to help their clients in targeting higher traffic and revenue. Social networking applications give businesses a place to join an online community and establish a customer list, build photo galleries and share promotional and important updates.

Some of the social media application we develop include:

facebook **twitter**

Applications

SHOWCASE

WEB Applications

Sioure has a reputation for developing innovative web applications that meet and exceed expectations. The most principal goals for the websites we create are functionality, usability and scalability. Since every company is different with its own specific goals, we implement lots of creativity to propose the best solutions for our customers.

Our Developers

Our Developers are fully certified, experience, dedicated, confidential, operates with a high level of professionalism, discipline and performance. At Sioure we focus on human capital management, we see our employees as assets and provide in house training as well as opportunities to attend workshops and programs at other tertiary level institutions in order to expand the company's knowledge base ensuring maximum performance.

Technology:

Object oriented technologies with component based architecture are used on many of our projects.

Project Methodology: Object Oriented Analysis and Design using Unified Modelling Language (UML) methods are adopted on most of our projects.

Monitoring and Evaluation: Most projects are monitored using UML Tools, project management tool to ensure consistent project execution.

JAVA EE

APPLICATIONS

Sioure Technologies develops Java EE enterprise applications for running large-scale, multi-tiered, scalable, reliable, and secure network applications. This application assist when creating large-scale, multi-tiered, scalable, reliable, and secure network applications by reducing the complexity and by solving problems encountered by enterprises.

Java EE Development

- Enterprise JavaBean (EJB) modules
- JAVA Servlets Web modules
- Enterprise Java Development Architecture
