About

Sioure Technologies is one of the most diverse and creative technological companies today. Sioure has key locations worldwide, superior facilities, state of the art equipment, a professional system of operation, a vast array of skillsets and over 10 years of experience.

For many years Sioure have exceeded the technological demands of the corporate world. We aim to provide innovative and cutting edge designs and concepts thus giving our clientele a competitive advantage, ensuring growth and increasing revenue in their organizations. At Sioure, we deliver futuristic adept services including but not limited to Web Development, Web Hosting, Web Marketing, Software Programming and Media Streaming for business or recreational purposes.

Our Mission

To deliver quality technological products to the world and develop one of the largest technology company in this century.

Developing Applications

Our employees are fully certified, experienced, dedicated, confidential, and operate with a high level of professionalism, discipline and performance.

Sioure implements CMMI (Capability Maturity Model Integration) and Agile Software Development Techniques. These methodologies, along with adaptive planning, allow our solutions to evolve and ensure that they are flexible to change. We also use Object Oriented Analysis paired with Unified Modeling Language as a standard way to visualize the designs of our systems architectural blueprints, resulting in nothing but excellence.

Integration With Platform Features

mobile apps

We at Sioure Technologies develop Mobile Applications for Apple & Android Devices. We develop enterprise application to be used in a developmental environment and consumer base mobile applications for sale in Apple and Google Play Stores. Our full range of mobile applications come with fully integrated features and enterprise database systems for push notifications and data queries.

Mobile User Experience / Interface Design

Exceptional user interface designs extend far beyond mere wireframes and blueprints, it stems from knowing your users and anticipating their actions. At Sioure we work hand in hand with you to ensure our superior interfaces maximize user experience.

Analytics

Sioure provides Search Engine Optimization (SEO), this is the process of improving the visibility of your website via natural search results in search engines like Google[®] or Yahoo![®], which are widely used by consumers looking for specific products and services.

The objective of providing SEO services is to get the websites of its valued consumers ranked high in the natural or "organic" section of search engine results. Since SEO rankings are earned and not bought, a natural search ranking is a sign of credibility to consumers.

Our Customers & Awards

In addition to providing top notch technical development of our web and video based project, Sioure smoothly and very effectively blended their creative contributions with those from the designers and writers in the rest of the creative team. We got everything we were hoping for on time and on budget.

Paul Fanning | Project Manager, FAO | www.fao.com

We have been in business for 17 years and for a long time information technology was intimidating to us, however realizing the need to integrate the modern tools to assist in the easy running of our company, we reached out to Sioure.

Sioure custom-made a reservation program for our business with specific detail to what our day to day functions required. It has been such a pleasure to work with a company who not only develop first class products but most importantly give the necessary support needed to see their projects through, which for us we greatly needed and they have our five stars!

Annika Povey | Cool Runnings, www.coolrunningsluxury.com

"Sioure Technologies has been able to deliver a modern and functional website based on our criteria and much to the satisfaction of our prospective clients"

David Holder | Cooperators General Insurance, www.coopgeneral.com
