Profile

COMPANY

About

SE Technology is one of the most diverse and creative technological companies today. Sioure has key locations worldwide, superior facilities, state of the art equipment, a professional system of operation, a vast array of skillsets and over 10 years of experience.

For many years SE Technology have exceeded the technological demands of the corporate world. We aim to provide innovative and cutting edge designs and concepts thus giving our clientele a competitive advantage, ensuring growth and increasing revenue in their organizations. At Sioure, we deliver futuristic adept services including but not limited to Web Development, Web Hosting, Web Marketing, Software Programming and Media Streaming for business or recreational purposes.

Our Mission

To satisfy the demands of this evolving technological era through the provision of cutting-edge exclusive products and services at a premium quality while attaining a triple bottom line.

Developing Applications

Our employees are fully certified, experienced, dedicated, confidential, and operate with a high level of professionalism, discipline and performance.

SE Technology implements CMMI (Capability Maturity Model Integration) and Agile Software Development Techniques. These methodologies, along with adaptive planning, allow our solutions to evolve and ensure that they are flexible to change. We also use Object Oriented Analysis paired with Unified Modeling Language as a standard way to visualize the designs of our systems architectural blueprints, resulting in nothing but excellence.

Integration With Platform Features

mobile apps

We at SE Technology develop Mobile Applications for Apple & Android Devices. We develop enterprise application to be used in a developmental environment and consumer base mobile applications for sale in Apple and Google Play Stores. Our full range of mobile applications come with fully integrated features and enterprise database systems for push notifications and data queries.

Mobile User Experience / Interface Design

Exceptional user interface designs extend far beyond mere wireframes and blueprints, it stems from knowing your users and anticipating their actions. At Sioure we work hand in hand with you to ensure our superior interfaces maximize user experience.

- Platform Design
- Wireframing
- Usability testing
- Visual Design
- Prototyping
- Human-Device Interaction

WEB HOSTING & CLOUD

Microsoft

|| Parallels™

SE Technology has offered companies web hosting for many years. We provide high-quality internet hosting solutions for small, medium and large businesses, government agencies, entrepreneurial individuals and non-profit organizations world-wide.

Our servers are housed in multiple data centers in the USA, Phoenix, Arizona & Chicago

Our facilities feature industry-leading technologies for maintaining optimal operating environmental control, redundant electrical systems and generators backed with enterprise-class UPS technology, and a wide range of advanced security measures.
